Dear FDA:

Please move ahead quickly with your plan to expand the foods-fat listings to include the amount of trans fats in foods.

Also, require food manufacturers to provide a complete list of the flavorings used in their products and eliminate listings such as "natural flavors", "artificial flavors", and "herbs and spices."

It is imperative that the FDA and the U.S. Department of Agriculture require that any ingredient that is genetically modified be described as such.

American food consumers have a right to know exactly what is in the food we purchase and eat. It is the responsibility of the Food and Drug Administration to ensure that we are well informed by requiring truth in food labeling.

Thank you for your consideration in this matter.

Sincerely,

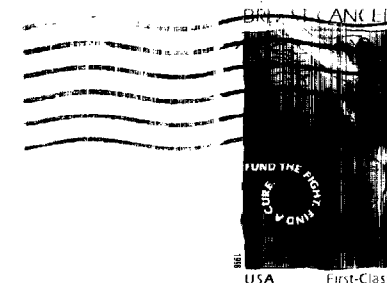

Frances Willis
